GWO Basic Safety Training Courses

First Aid

2 days

GWO First Aid Modules are to ensure that delegates are able to demonstrate understanding of the importance of first aid in a safe manner according to ERC and AHA guidelines.

Students will be able to demonstrate, normal signs and symptoms of serious and minor injuries, and illness related to the human body. Upon completion students will have an understanding of First Aid A – B – C's and use of an AED.

Working at Heights

2 days

GWO Working at height is to ensure that delegates are able to demonstrate knowledge of hazards and risks associated with working at heights including understanding of current national legislation regarding working at heights, correct identification of PPE, including identification of European/Global standard markings e.g. harness, hard hat, and lanyards, etc. Upon completion individuals are able to demonstrate the knowledge and skills to correctly inspect, service, store and use the correct personal protection and rescue or evacuation equipment.

Manual Handling

4 hour

GWO Manual handling courses are to demonstrate understanding of the importance of carrying out work duties in a safe and sound manner in accordance with the legislative requirements for their geographic location. Practical exercises are conducted in order to fully understand and demonstrate use of legs, arms, and back muscles when lifting or moving heavy objects.

Sea Survival

1,5 days

GWO Sea Survival is to ensure that Individuals are able to demonstrate knowledge of dangers and symptoms related to hypothermia and drowning. This is including understanding of the advantages and limitations of the different LSA and PFPE commonly used offshore in the wind energy industry. With this students must be able to don and use the equipment accordingly. In practical exercises individuals must demonstrate safe transfer from vessel to dock and vessel to foundation including being able to demonstrate knowledge of the emergency and safety procedures on installations, vessels and WTG outlining individual and collective survival techniques at sea.

Fire Awareness

4 hour

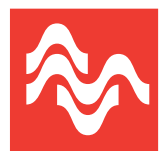

GWO Fire Awareness is to ensure that delegates are able to demonstrate knowledge of the development and spread of fire, the causes of fires in wind turbines and the dangers related to this. As so, individuals are able to identify any sign of a fire in a wind turbine environment. Upon completion individuals are able to demonstrate correct actions on discovering a fire including correct operation and fire extinguishing by means of the firefighting equipment in a WTG.
